Exo Digital | AI, Design & Growth

Senior Consulting Engineer
February 2025 - August 2026 (1 year 7 months)
Melbourne, VIC

Helped UniFresh built the ERP they need.

My core responsibilities:

- Architected and developed custom Odoo modules and applications using Python, JavaScript, and OWL (Odoo Web Library), ensuring seamless inheritance and alignment with standard framework logic.
- Designed complex PostgreSQL database schemas and optimized query performance, implementing proper indexing and profiling tools to significantly reduce server response times under high concurrent user loads.

- Developed enterprise-level integrations by developing robust RESTful APIs, JSON-RPC, and XML-RPC layers connecting Odoo with critical external platforms (E-commerce, 3PL, Payment Gateways, and CRMs).
- Enforced code quality and engineering best practices across the development team, conducting rigorous code reviews based on PEP 8 and Flake 8 standards.
- Managed CI/CD pipelines and DevOps workflows for automated testing and deployment, maintaining multi-stage server environments (Development, Staging, Production) using Odoo.sh.
- Engineered defensive, future-proof customizations to minimize technical debt and ensure smooth, low-friction migrations across major Odoo version upgrades.
- Supervised developers from Vendors and Partners alike, making sure we deliver the best and cleanest code possible.
